

WHAT IS SAFETYNET™?

SafetyNet™ is a program that uses proven technology to help protect and locate individuals with cognitive conditions such as autism, dementia, Alzheimer's, Down Syndrome and Traumatic Brain Injuries who are prone to wander and become lost. The program allows specially trained and equipped agencies the ability to locate and bring these people home quickly and safely.

HOW IT WORKS

- They would wear a SafetyNet™ Bracelet at all times. The Bracelet features a Radio Frequency transmitter that emits a continuous signal.
- As soon as the person is discovered missing, 911 and SafetyNet™ must be notified **immediately**.
- Trained search and rescue teams track the signal being emitted from the SafetyNet™ Bracelet.
- Once public safety searchers locate the missing person, they can return them home safely.

PROVEN TECHNOLOGY

Radio Frequency (RF) technology can work in densely wooded areas, buildings and shallow water, even when GPS and cellular technology cannot.

WE WORK DIRECTLY WITH LAW ENFORCEMENT

Law enforcement, SAR and other public safety agencies are trained, certified and equipped with SafetyNet™ Search and Rescue Receivers. In addition, personnel are trained on how to effectively communicate with people who have cognitive conditions.

COMPREHENSIVE SUPPORT SYSTEMS

The SafetyNet™ service includes a secure database of key client information to assist in search and rescue operations as well as 24/7 customer support.

SUCCESS STORIES

Since its inception, SafetyNet™ has had hundreds of successful searches in numerous states for missing people with cognitive conditions.
